Cables version:

s= 1x0.5mm² L= 250mm

Release spring will be

incorporated by defect

Standard spring force:

Fs(s=0mm) = 1.6N

Fs(s=12mm) = 0.4N

ER35/CC

1) Fm Solenoid force is given acording to VDE0580 without deducting the spring force or the plunger weight if vertical mounting.

2) Time is given on these conditions: Coil supplied under nominal voltage ; Stabilized in it's working temperature ; Load 70% of the solenoid force ; Horizontal assembly ; Standard stroke initial position; 20°C ambient temperature.

3) Time is given on these conditions: Standard spring ; without load on shaft ; Horizontal assembly ; Standard stroke initial position.

Layout: o = Available ;

- Voltage under demand: They can be manufactured at voltages between the maximum and minimum voltage values shown in the chart.

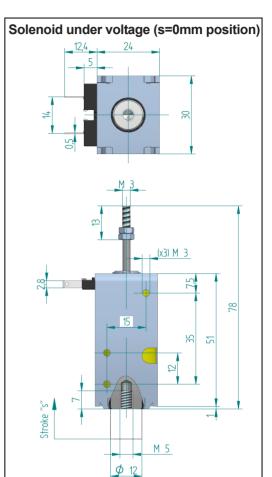

- To feed in alterning current the solenoid will have a rectifier incorporated in the coil.

- The duty cycles described in the chart are standard, they can be manufactured in any intermediate value.

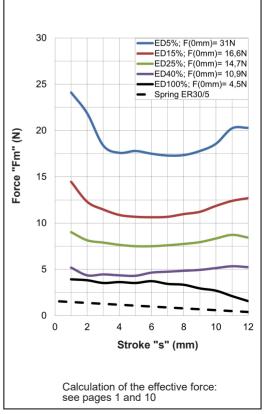

- If any customization from the original is needed, please ask us.

- Earthing is recommended if the metallic parts are accessible.
